

6 Eli and Peta share \$275 in the ratio 2:3

Eli gives $\frac{3}{11}$ of his share to charity.

Peta gives 0.32 of her share to charity.

Work out the total amount that Eli and Peta give to charity.

$$\begin{array}{c} E \quad P \\ 2:3 \\ 2+3=5 \end{array}$$

$$\left. \begin{array}{l} \text{Total} \\ \text{Savings for} \\ \text{charity} \end{array} \right\} = 30 + 52.8 = \underline{\underline{\$82.8}}$$

Eli:

$$\frac{2}{5} \times 275 = \$110$$

charity Savings $\Rightarrow \frac{3}{11} \times 110 = \30

Peta:

$$\frac{3}{5} \times 275 = \$165$$

charity Savings $\Rightarrow 0.32 \times 165 = \52.8

$$= \$82.8$$

(Total for Question 6 is 4 marks)

The weight of a bag of apples is 475 g correct to the nearest g

$$\frac{1}{2} = \pm 0.5$$

(a) Write down the lower bound of the weight.

$$LB = 475 - 0.5 = \underline{\underline{474.5}}$$

$$474.5 \text{ g} \\ (1)$$

The height of a box is 120 cm correct to the nearest 10 cm

(b) Write down the upper bound for the height.

$$\frac{10}{2} = \pm 5$$

$$UB = 120 + 5 = \underline{\underline{125}}$$

$$125 \text{ cm} \\ (1)$$
