

- 1 A logo designer is working on a circular badge design in her UI/UX portfolio. The badge is based on a circle with centre O . Points A , B and C lie on the circumference, and AB and BC are chords of the circle.

The angle at the circumference, $\angle ABC$, is 58° .

Work out the size of angle x , the reflex-free angle AOC at the centre of the circle.

$x = \dots\dots\dots^\circ$

Give a reason for your answer.
